ಶ್ರೀ ೮ನೇ ಸಂಖ್ಯೆ ೦೦೩೬೬೨ ನೇ ವಿಶೇಷ ದೇವಾಲಯ

The first part of the paper is devoted to a discussion of the  
 general principles of the theory of the structure of the  
 crystal lattice. It is shown that the structure of the  
 crystal lattice is determined by the arrangement of the  
 atoms in space. The arrangement of the atoms is  
 determined by the forces acting between them. The  
 forces acting between the atoms are of two kinds: the  
 attractive forces and the repulsive forces. The attractive  
 forces are of two kinds: the electrostatic forces and the  
 van der Waals forces. The repulsive forces are of two  
 kinds: the electrostatic forces and the van der Waals  
 forces. The electrostatic forces are of two kinds: the  
 attractive forces and the repulsive forces. The van der  
 Waals forces are of two kinds: the attractive forces and  
 the repulsive forces. The attractive forces are of two  
 kinds: the electrostatic forces and the van der Waals  
 forces. The repulsive forces are of two kinds: the  
 electrostatic forces and the van der Waals forces.
